InnovateNSUT

The All-in-one solution for College Students

Too many cards to keep?

Why do we need to carry an ID Card, a Library Card, a Bus Card, a hostel card, or maybe a debit card in a university campus all the time?🤔🤓

For multiple operations... Right?

But what if we tell you that there's no need to carry individual cards all the time and just one card can solve the purpose.🙂

Many Operations, One Solution

The 1D Card!

A COMMON SOLUTION TO UNIVERSITY STUDENTS

INTEGRATED DATASET CARD

- Merchant Payment
- Fees Payment
- Attendance
- Book Issuance
- User Transparency
- Item Issuance
- Faster Connectivity (LAN feature)
- Gate Entry/Exit

How does it work?

1D Card is an integrated dataset card that uses a common UIMS(University Information Management System) and derives all its' data from it.
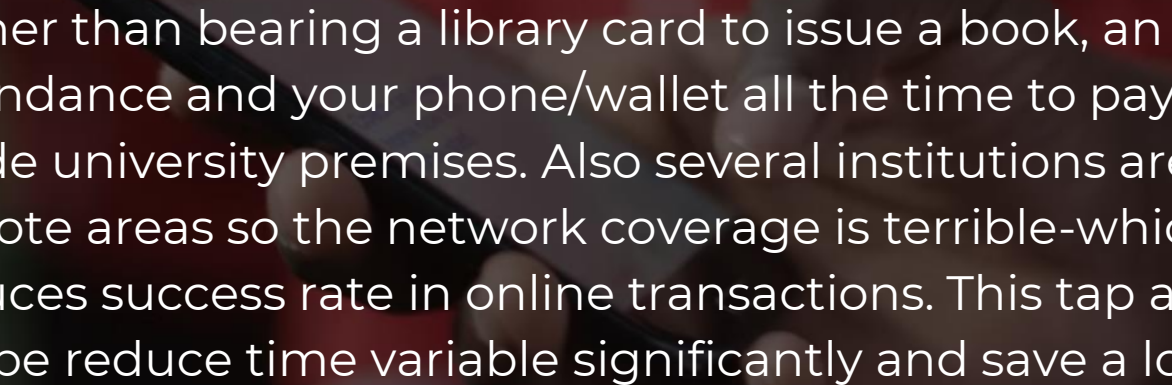

This card is based on tap and swap payment technique as well as a QR code is provided on this card carrying UID of every student/teacher that can be scanned by the concerned department for attendance, issuance, entry/exit etc.

The payment card uses Digital Wallet protocol and works only under LAN in university premises/ university ID.

How does it make the difference?

You don't need to use separate cards when you have our multipurpose ID card. Every need of a university student has been assembled in our ID card. Just swap, scan and pay. It'll save students' as well as staffs' time, reduce paper-work significantly, and help to unite all the essentials into an ecosystem; An University made ecosystem- Students, staff and merchants.

A resource unified is a barrier removed.

Rather than bearing a library card to issue a book, an identity card for attendance and your phone/wallet all the time to pay merchants inside university premises. Also several institutions are located in remote areas so the network coverage is terrible-which significantly reduces success rate in online transactions. This tap and pay feature will be reduce time variable significantly and save a lot of time.
